Summary

Data scientist with a BSc in Mathematics and Statistics and Moringa School data science training. Builds, evaluates and deploys machine learning models: a credit-risk app (ROC-AUC 0.91), a churn model that identifies 95 of 121 churners on held-out data, and analytics dashboards built during an internship at MymoviesAfrica.

Skills

Programming and libraries: Python, SQL, pandas, NumPy, scikit-learn, XGBoost, imbalanced-learn, matplotlib

Machine learning: Classification, feature engineering, hyperparameter tuning, cross-validation, model evaluation, imbalanced data, model deployment, convolutional neural networks

Data analysis: Statistical analysis, data cleaning and integration, data visualization, dashboards, text mining

Tools: Streamlit, Git and GitHub, Jupyter, APIs

Projects

Credit Risk Prediction App | Python, scikit-learn, Streamlit | Live demo · Code

- Built and tuned a Random Forest to predict loan default (ROC-AUC 0.91), balancing classes with SMOTE; at a 0.6 threshold it reaches 81% precision and 71% recall on defaulters.
- Deployed the model as a Streamlit web app, packaging the scaler and model in a single pipeline.

Telecom Customer Churn Prediction | Python, XGBoost, scikit-learn | Code

- Compared six model types and tuned XGBoost for F1 with 5-fold cross-validation, identifying 95 of 121 churners on held-out data at 84% precision.

- Found 42% churn among international-plan customers (11% without) and 52% after four or more service calls; turned the findings into retention recommendations.

Hacker News Hiring Posts Analysis | Python, pandas, text mining | Code

- Collected 3,691 job posts through an API and extracted about 40 skills with pattern matching to track demand over 12 months.
- Validated the matcher against an independent count and corrected a flawed classification rule; documented the limitations.

Chest X-ray Pneumonia Classification | Python, convolutional neural networks

- Built a convolutional neural network to detect pneumonia in chest X-rays, using preprocessing and augmentation to improve generalization (92% accuracy).

Experience

Intern | MymoviesAfrica, Nairobi | April 2023

- Built Content Analytics and Market Analytics dashboards tracking views, ratings, engagement, market share, audience demographics and revenue trends.
- Collected, cleaned and integrated data from several sources, including social media and user interactions.
- Applied statistical analysis and data visualization to identify customer and content trends, and worked with cross-functional teams to turn them into marketing and content recommendations.

Education

Data Science | Moringa School, Nairobi

BSc Mathematics and Statistics | University of Eldoret, Eldoret
